

# CUSTOMER GALLERY

Tanks that add and blend into the landscape, not detract from it. **Unobtrusive and modest.** The tanks offer flexibility to suit your site and requirements. They can be coupled together in an almost infinite number of arrangements. They are multifunctional; water storage and retaining wall and/or barrier (sight, sound, wind, thermal, physical, fence), garden feature, vegetable garden, seating etc. PLUS they can be easily adapted for onsite detention.

landscape tanks® 

Used as a pond, garden feature, front fence, onsite detention, along with retaining wall and water storage.  
**Six functions** sitting beautifully and seamlessly with each other. Pond feature shown on next page.

Pond feature.

A stepped retaining wall, water storage and raised garden bed.

A functional planter with water storage - finished with a striking stone tile cladding.

Water storage and retaining wall system that also softens the house's profile through effective use of the planters.

Retaining wall, garden bed and water storage.  
Placed hard against the house veranda and in doing so, cleverly concealing foundation works

Other applications, including decking, outdoor kitchen or BBQ, two water features one doubling as a fish pond.

## Factory tinting options.

Colour all surfaces and avoid painting high tide marks that can be left after soil settles / moves.

\*Colours shown may vary to physical product due to differences in screen resolution.

Installations in Progress.  
Low preparation. Quick / easy installation. Low reliance on trades. No water testing required.

## PATENTED "O" RING SEAL

Patented 50mm Seal. Suits "class 12" 50mm heavy duty pvc pipe. Used as a connection / equaliser / pump seal; (the seal which provides the connection of tanks and the flow of water between them or connects to your pump).

Patented 100mm Seal. Suits standard 100mm DWV pvc pipe. Allows quick connection of inlet and overflow pipes. Can be used as a connection / equaliser seal; (the seal which provides the connection of tanks and the flow of water between them).

Patented 150mm Seal. Suits standard 150mm DWV pvc pipe. For high gauge / flow connections / engineering applications.

Pin head lifts (aka "lifting anchors") as presented in all tanks and planters / tops, four positions in all four corners.

Flat top. Optional, additional costs apply.

Knock outs as present in every second planter top, on one long side, in two positions near corners. The knock outs allow inletting from down pipes, through the planter top.

**100% Australian owned, operated and near 100% Australian content**
